CADRE TECHNOLOGIES

Established

For over a quarter of a century Cadre Solutions have been enhancing the productivity and efficiency of our clients by providing quality solutions to supply chain challenges. With our proven logistics solutions we have helped companies reduce inventories, add complementary products and services, outsource non-core activities, improve customer satisfaction, and pilot new business opportunities with less risk.

Flexible

The Cadre team works closely with you to create logistics solutions to meet your company's specific needs and competitive challenges. We begin a thorough evaluation process with a needs analysis to establish accurate logistics bench marks and performance goals. Our attention to detail ensures the implementation of a solution that meets your goals.

Complete

Cadre delivers a full line of logistics technology products and services along with a network of third party distributors that utilize similar systems and operating procedures. Cadre has an excellent track record of forming lucrative operational and technological partnerships that blend highly advanced supply chain management techniques into complete solutions.

LogiView®

Intelligent Supply Chain Management

LogiView empowers you with the ability to successfully aggregate, monitor and analyze shipments and inventory across a wide platform of business units, suppliers and enterprises. Utilizing a suite of products and features designed to meet the supply chain challenges of today, LogiView enables you to reduce inventories and pro-actively manage your supply chain. LogiView leverages a unique combination of deep application functionality, workflow, event management and technology infrastructure to extend the capabilities of existing supply chain applications.

VISIBILITY

LogiView provides inbound, outbound and current inventory levels through your browser or to external systems providing accurate information for monitoring orders, reconciling inventories and forecasting. Such precise tracking enables you to closely monitor inventory levels from SKU to batch code to serial number and track shipments through to delivery.

AGGREGATION

LogiView virtually eliminates multiple integrations by providing a centralized logistics data hub for your supply chain. The centralized data enables time-sensitive decision making for allocation of inventory and transportation availability without costly time consuming effort.

EVENT MANAGEMENT

Critical or unplanned events are instantly managed via notification such as email, fax, pager, mobile phone or PDA helping you troubleshoot and manage the unpredictable aspects of your business. LogiView makes execution level decisions based on your codes of conduct and current supply chain status.

COLLABORATION

LogiView provides your suppliers visibility into your inventory, allowing for greatly enhanced collaborative planning of inventory movement based on order volume and production requirements.

DATA MANAGEMENT

Full data messaging capabilities including EDI, XML, and other data and communication formats facilitate trading partner interaction for the exchange of orders, advance ship notifications and inventory synchronizations.

ORDER PROCESSING

Orders submitted manually through the LogiView browser or electronically via the data management portal are processed and evaluated using your business rules then transferred to an appropriate distribution center for processing.

PERFORMANCE ANALYSIS

LogiView quickly produces reports both physical and electronic, facilitating instant analysis of current supply chain status including recent trends, on-time and short situations.

VIRTUAL TRAFFIC MANAGEMENT

LogiView allows for selection, placement and tracking of shipments. Integration with carriers, logistics services and transportation management systems makes LogiView a complete inventory and transportation resource.

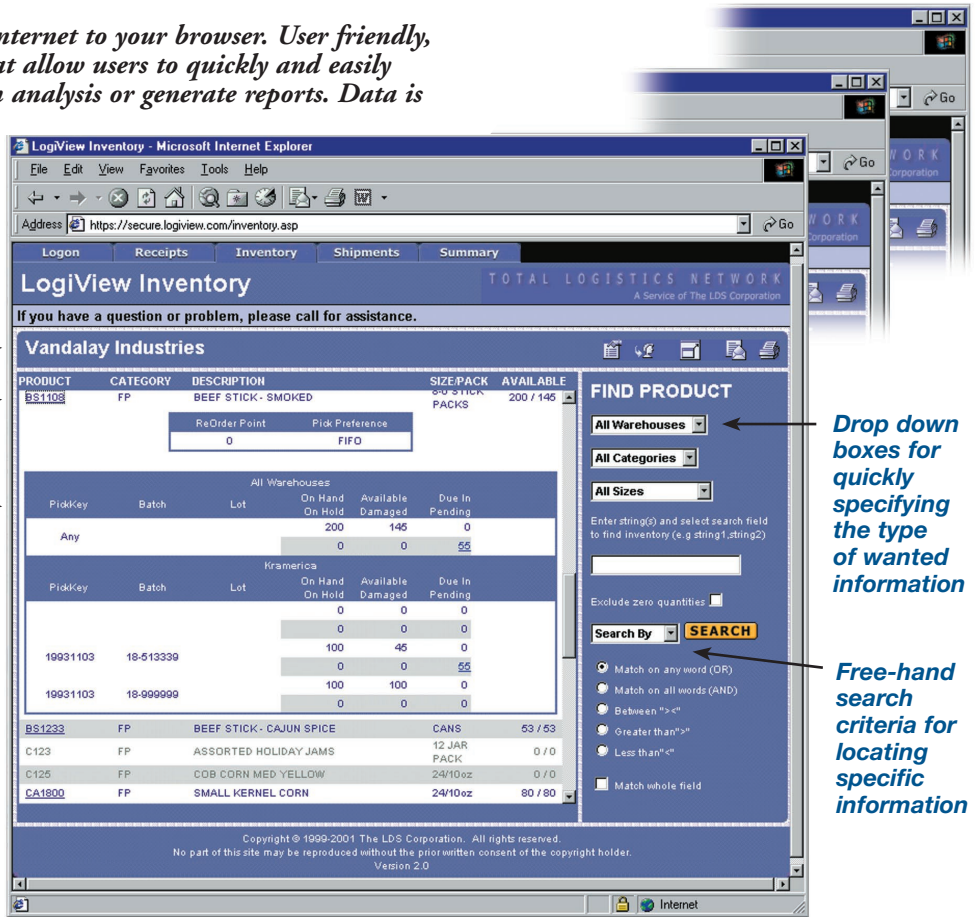
INTEGRATED WAREHOUSE MANAGEMENT

LogiView integrates with any warehousing or enterprise system. Highly flexible and scalable LogiView is already integrated with other Cadre client systems forming the largest common platform network of logistics providers in the world.

Brand Visibility for Prestige

Prestige Brands, Inc. markets, sells and distributes well-recognized, branded consumer products in the personal care, over-the-counter drug, and household cleaning categories to food, drug and mass merchandisers.

Supply chain data is delivered via the Internet to your browser. User friendly, LogiView® presents simple features that allow users to quickly and easily locate important information, perform analysis or generate reports. Data is transformed into information and provided through a series of tabs reflecting Inbound Shipments, Inventory Levels, Outbound Shipments and more.



Header indicates current data set

Summary Line indicates order number and destination

Detail data available for every shipment or SKU

Drop down boxes for quickly specifying the type of wanted information

Free-hand search criteria for locating specific information

LogiView®

LogiView is the heart of your logistics information effort. LogiView centralizes warehousing and transportation data and enables visibility, collaboration and process management for your entire supply chain. LogiView provides you with information required for managing your business.

Summary line identifies shipment ID and destination

Detail shipment information reflects current status

SKU level data is included with shipment information

Customer service, sales, logistics personnel and management have constant access to shipment status through LogiView. Information may also be emailed to the consignee.

"Traditionally, warehouse companies spend countless hours manually accumulating information to satisfy their customer's requirements. LogiView does it automatically."

– Dick McCallum, MIS/Office Manager of Fore River Distribution

"I appreciate LogiView's intuitive layout. Our fast growing company has added numerous employees and all of them have come up to speed with minimal training."

– Keith Kolakoski, Director of Logistics, Prestige Brands

Prestige looked to LogiView to provide centralized access to inventory, as well as inbound and outbound data from their supply chain providers.

LogiView has also grown and adapted along with Prestige. As the Prestige supply chain has evolved to include new and different 3rd party warehousing and logistics providers, LogiView has expanded and moved right along side. No matter the provider, LogiView continues to provide supply chain visibility and process management to Prestige stakeholders.

Cadre Technologies has built a solid reputation in the logistics market by producing quality software products and providing superior support. By delivering real-world solutions in a timely and cost effective manner, Cadre has fostered outstanding customer loyalty and built a strong reputation as an industry leader in warehouse management solutions.

Cadre—Defining the Future of Intelligent Supply Chain Logistics

Cadre software applications enable manufacturers, distributors and retailers to track fulfillment and distribution events using the Internet, optimize their distribution network, communicate with their providers, and view their inventory data. Cadre delivers logistics solutions as hosted applications as well as through traditionally installed and operated solutions.

Accuplus - The Accuplus® Integrated Distribution Logistics® System is a comprehensive software package for managing warehouse and distribution logistics operations.

Cadence – Cadence is a unified logistics system built on the Microsoft .NET platform and operates in real-time to provide Warehouse Management, Order Management, Transportation Management, and Activity Billing. It features web, speech, bar-code and graphical user interfaces with workers, managers, clients, customers, vendors, and shippers.

All Cadre WMS solutions feature, the ability to manage multiple warehouses, customers, products, rates, carriers, consignees, inbound receipts, bills of lading, and much more. They also produce reports of inventory, activity, and a wide variety of management and customer specific information.
